Encl: (1) National Stock Numbers To Be Reported
(2) Sample DD Form 1348-1 Issue Transaction
(3) Sample DD Form 1348-1 Receipt Certification
(4) Sample Format for Reporting Interservice Transactions

Report Required: Small Arms Serial Inventory (Report Symbol
MC-8300-01), par. 8

1. Purpose. To provide guidance and reporting instructions for the Marine Corps Serialized Control of Small Arms System.

2. Cancellation. MCO 8300.1B.

3. Change Notation. Significant changes contained in this revision are denoted by asterisks (*) shown in the outer left margin.

4. Background. The Department of Defense (DoD) has directed that each of the services establish a life-cycle control of all small arms, by serial number. This system utilizes, as a minimum, the following standard specifications:

- a. A central activity for reporting and accumulating data.
- b. Transaction reports, by activity address code, submitted by all military service organizations which have small arms as defined by the DoD.

PCN 102 106150 00

27 Mar 1984

c. Submission of transaction reports covering such events as movement from the vendor, receipt from procurement, issues, transfer to and from repair/rework, and transfer to disposal.

d. Minimum data elements reported throughout the life cycle: national stock number (NSN), nomenclature, serial number, and location.

5. Objective. The objective of the Marine Corps Serialized Control of Small Arms System is to augment security control by maintaining permanent serial number records of all small arms within the Marine Corps and to interface with DoD central registry on matters pertaining to serial number control of Marine Corps-owned small arms.

6. Information. The Marine Corps Serialized Control of Small Arms System is in no way intended to reduce the requirement for strict adherence to the demands for adequate security measures as expressed specifically in references (a) through (c) or in other Marine Corps directives, nor is it intended that the requirements for quantitative reporting of controlled items be ignored but, rather, that this system act as an adjunct to the overall security and allowance controls required by Federal law, the DoD, and the Commandant of the Marine Corps (CMC).

7. Definitions. The following definitions are applicable to this system:

a. Accountability. The obligation imposed by law or lawful order or regulation on an officer or other person for keeping accurate records of property, documents, or funds. Accountability is concerned primarily with records, while responsibility is concerned primarily with custody, care, and safekeeping.

b. Reporting Unit. Any unit having an allowance, either permanent or temporary, of small arms (including teamshooting small arms), and/or having firearms in its possession, such as Regular and Reserve units, Marine Corps Junior Reserve Officer Training Corps (MCJROTC) units, museums, special services activities, or research, development, test, and evaluation (RDT&E) activities. Reporting and validating requirements for MCJROTC units will be accomplished by the Marine Corps district headquarters which has cognizance over each MCJROTC unit concerned.

*c. Small Arms. Weapons in either serviceable, unserviceable, or demilitarized condition including the following: rifles; pistols; revolvers; line throwing guns; shotguns; machineguns; submachineguns; pyrotechnic pistols; flamethrowers; cannons up to and including 30mm; all grenade launchers; single, multishot, or portable rocket launchers; individually operated weapons which are portable and/or can be fired without special mounts or firing devices, and which have potential use in civil disturbances and are vulnerable to theft; and all other hand- or shoulder-fired firearms, up to and including .60 caliber. All reportable small arms will be registered, whether or not they have NSN's. (See enclosure (1) for specific NSN's required to be reported.)

d. Activity Address Code. An alphabetic-numeric code assigned by Headquarters Marine Corps to identify Fleet Marine Force (FMF), Supporting Establishment, Reserve, and other organizations. These codes are published in reference (d).

8. Action

a. System Requirements

*(1) All Marine Corps activities possessing or having an allowance of small arms are required to report the serial numbers of those small arms to the Marine Corps Registry, Naval Weapons Support Center (NWSC), Crane, Indiana 47522. (Report Symbol MC-8300-01 has been assigned to this report.) New units, upon activation, shall report the NSN's (enclosure (1)), noun nomenclatures, serial numbers for their small arms, and their activity address codes (AC's), as prescribed above.

(2) Special services small arms weapons are those purchased from various sources with nonappropriated funds for use in welfare and recreational programs, and they are in no manner controlled by the provisions of the Small Arms and Weapons Management Program. They are the property of the special services department of the organizational activity or unit that purchases them, and they are used and managed at that department's discretion. However, the serial numbers of these special services weapons will be recorded in the Marine Corps registry as a convenience to the owners of the weapons in the event of loss or theft.

(3) Small arms which cannot be identified by a standard NSN (i.e., RDT&E, Marine Corps museums, and special services activities) or weapons held as historical mementos are reported as follows. Provide a complete description of the weapons which shall include, as available, but not limited to, manufacturers's name, caliber, country of origin, serial number, and unit's AC. The descriptive nomenclature may be limited to such terms as "Kentucky Long Rifle," "Maxim Machinegun," etc., but should be a recognized title in common usage. The Marine Corps registry will assign a local stock number to weapons using information provided. For those weapons held by Marine Corps museums which do not have a serial number, the accession number will be used as the serial number. It is important that sufficient descriptive data be provided with the accession number.

*b. System Operation

*(1) Subsequent to the initial load to the data base at NWSC, Crane, Indiana, units shall report any receipt or issue of reportable items to the Marine Corps registry for maintenance update of the data base. Transfer reports are required in all instances where the accountable officer is required to cause adjustments (gains or losses) to the accountable balance of that individual's records. Reports are provided to the NWSC, Crane, Indiana, by copy of the DD Form 1348-1 (DoD Single Line Item Release/Receipt Document). In order for the Marine Corps registry to adjust the appropriate AC's account, the "shipped from" and "shipped to" blocks must contain an AC number plus an "in the clear" address. (See enclosure (2).) When gains/losses occur as a result of survey, investigation, or miscellaneous transactions are posted, a copy of the vouchering transaction shall be forwarded to NWSC, Crane, Indiana 47522. All reports submitted to NWSC, Crane, will be forwarded on an "as occurring/daily basis." Batch submission of documents which precludes timely reporting is not authorized.

(2) Small arms transfers which change physical custody but do not change accountability are nonreportable transactions; e.g., initial turn-in of a weapon to maintenance for repair and return.

*(3) When units transfer from one AC to another AC, force commanders will report the AC that will be involved, citing type I address (designation) changes, in "from"/"to" format, to the Commanding Officer, NWSC, Crane, Indiana, 30 days prior to the effective date. A copy of this report will be furnished the Commanding General (Code 824/SCS), Marine Corps Logistics Base (MCLB), Albany, Georgia 31704.

(4) As noted in paragraph 8b(3), preceding, all Marine Corps units are required to report every action that changes

the accountability location (one unit to another) or quantity (either increase or decrease) of small arms, to include receipts, turn-ins, and surveys. The following procedures shall be followed in reporting such actions:

(a) Procurement. Purchase requests or requisitions of small arms by military interdepartmental purchase request (MIPR), formal contract, or Military Standard Requisitioning and Issue Procedures (MILSTRIP) requisition will specify that suppliers must provide a listing or deck of punched cards depending on the capability of the supplier, to the consignee of any small arms provided under the request and to the Marine Corps Registry. The listing or deck of cards is to be forwarded by separate cover (registered mail) to ensure that the small arms shipped can be verified by serial number upon receipt and appropriate entries made into the system. Additionally, the supplier will be required to ensure that serial numbers for weapons in any container are stenciled to the first intermediate container. This information will be entered in the system to provide control over the shipment while it is in transit. In the event the shipment is lost or delayed in transit, a record of the serial numbers involved will be available. When shipment is received, a signed copy of the documentation shall be forwarded to the Marine Corps registry.

(b) Shipments. When arms are shipped from one unit/activity to another (including interservice shipments), one legible copy of the DD Form 1348-1 shall be forwarded to the Marine Corps registry at time of shipment. This copy shall contain the list of serial numbers of the small arms included in the shipment, either included on or appended to the document. This information shall be entered in the system to provide control over the shipment while it is in transit. In the event the shipment is lost or delayed in transit, a record of the serial numbers involved will be available. Additionally, a serial number listing will be enclosed in each container, listing in numerical sequence those serial numbers in that container. An advance copy will be sent to the receiving unit, listing all serial numbers (by box) in a particular shipment. When the receiving activity has not confirmed receipt of a small arms shipment within 45 days of the date of the advance shipping, NWSC, Crane, Indiana, will query the receiving unit to ascertain the location of the small arms shipment. If the receiving unit has not received the material, that unit will notify the shipper of the nonreceipt; and the shipper is responsible for taking tracer action. If the shipment is not located within 5 working days, an initial missing, lost, stolen, and recovered (MLSR) report (message) must be filed in accordance with reference (a) and paragraph 8e of this Order.

(c) Receipts. Receipts shall be reported as they occur to the Marine Corps registry by forwarding one legible, signed, and dated copy of the DD Form 1348-1 included with the shipment. (See enclosure (3).) If a punched card deck is received with a shipment from another service, this card deck will be forwarded to NWSC, Crane, Indiana, in addition to the signed copy of the DD Form 1348-1. The signature copy verifies that the shipment is complete and that the data and serial numbers entered on the shipping document are correct. In the event the quantity received is correct, but a discrepancy exists in the serial numbers received, the exception will be noted and the actual serial numbers received will be reported to both NWSC, Crane, and the shipper. Other discrepancies do not warrant holding the DD Form 1348-1 until a corrected copy has been received from the shipper. This is a concern between receiver and shipper and should not delay a corrected copy being forwarded to the Marine Corps registry. Quantitative discrepancies will be reported through established means for reporting lost, missing, or stolen weapons. However, those weapons actually received will be reported by serial number to NWSC, Crane. All special services, RDT&E, museum, and unit memento small arms will be reported to the Marine Corps registry by complete description and serial number as specified in the preceding requirements. Special services weapons will be clearly identified as such to NWSC, Crane. This action will preclude nonappropriated fund weapons from being included in validations with Subsystem 13 of the Marine Corps Unified Material Management System (MUMMS).

(d) Letter of Unserviceable Property. The maintenance unit will provide a letter of unserviceable property (LUP) to the owning unit for weapons declared unserviceable, with an information copy of the LUP submitted to the Marine Corps registry. The results will be that weapon accountability will change from the owning unit to the maintenance unit cited on the LUP. The owning unit will submit a copy of the LUP to the Marine Corps registry. The LUP is also used to support the supply transaction of removing the weapon from the property records of the accountable unit and transferring the weapon to the maintenance unit.

(e) Interservice Transactions. When small arms are shipped to an activity external to the Marine Corps, one legible copy of the DD Form 1348-1 with the list of serial numbers in the shipment, either included on or appended to the document, shall be forwarded to the Marine Corps registry. The Marine Corps Serialized Control of Small Arms System, operating as part of the DoD Small Arms Serialization Program, has additional requirements imposed on it when shipping small arms to external activities. All Marine Corps units/activities which have access to keypunch

machines will submit two 80-column weapon serial number (WSN) control cards with the shipment, for each serialized small arm shipped.

1 The card format detailed enclosure (4) will be utilized for the following transactions:

a Transfer of small arms to an activity external to the Marine Corps.

b Shipments of small arms to another service for repair. This procedure will be followed even when it is reasonably certain that the same weapons will be returned to the owning Marine Corps unit/activity.

2 Submit a copy of the DD Form 1348-1 to NWSC, Crane, Indiana 47522, for small arms that remain in Marine Corps units' physical custody for security reasons after the accountability has been transferred to a Defense Property Disposal Office (DPDO) activity.

3 Special services weapons turned in to DPDO will be clearly annotated by placing "NAF" in the remarks block of the DD Form 1348-1 to prevent confusion between reports for appropriated fund and nonappropriated fund stocks.

(f) Collateral Equipment. It is the intent of this Order that small arms reportable by enclosure (1) not be carried as collateral equipment, in order to permit an accurate accounting of all reportable weapons. In this regard, tables of equipment (T/E's) and SL-3's reflect this policy (e.g., .50 cal. machineguns for the M60 Tank and LVT 7 vehicles are being changed in SL-3 revisions from the "collateral equipment" category to "using unit responsibility.") Any questions concerning small arms in relation to collateral equipment may be referred to the Commanding General (Code 824/SCS), MCLB, Albany, Georgia 31704.

c. Inventory and Reconciliation

(1) At least annually, and on a cyclic basis, the Marine Corps registry will provide each Marine Corps reporting unit with a machine-produced listing of all small arms, by serial number, recorded as being in that unit's possession. This listing will be in two parts and will be required to be compared, by serial number, to those small arms physically on hand. Activities that possess bulk quantities of small arms or have weapons in level "A" packing in accordance with the methods presented in reference (e) or have inventory waivers in accordance with reference (c) may verify their small arms by comparison with

subsidiary records rather than by physical comparison. Discrepancies, with supporting documentation to show proof of issue, receipt, disposal, or survey action, will be submitted to the Marine Corps registry for corrective action. If unresolved discrepancies remain, reporting will be in accordance with reference (a). If no discrepancies exist, the certification statement will be signed and dated by the accountable officer and one copy returned to the Marine Corps registry. All responses to NWSC, Crane, Indiana, will be made within 45 days from the date of the letter requesting that a validation be conducted. The remaining copy will be retained in the unit's files for review by authorized audit, investigative, or inspection agencies.

(2) An additional check on the validity of the unit reports is provided by a validation of the quantitative entries for reportable items extracted from Subsystem 13 (controlled items) of MUMMS with summarized data from the records established at NWSC, Crane, Indiana. Periodic subsequent validations will be scheduled to ensure that routine reporting is being accomplished. In this regard, it is recognized that, due to "time traps," the files may not be identical. (Time traps could be caused by sequencing, updating of computer files, and mail delays, to name a few.) However, files should be close enough to ensure reporting is occurring, as required. Additionally, pending transactions should provide sufficient detail to overcome this discrepancy.

(3) The CG, MCLB, Albany, Georgia, will provide NWSC, Crane, Indiana, with notification of unit activations/deactivations as they occur to provide a checkoff list for NWSC, Crane, to ensure that small arms records involved in such moves are added to or removed from the files in a timely manner.

d. Local Automatic Data Processing (ADP) Support. Local (class III) Marine Corps ADP system support shall be minimized and confined only to those actions considered essential to effective management of serialized small arms inventories.

*e. Special Instructions

(1) The status of MLSR small arms will be reported, as soon as the loss/theft/recovery is established, in accordance with reference (a) to the CMC (Code MPH), providing information copies to the Marine Corps registry. Whenever a weapon has been reported missing/lost/stolen and is subsequently recovered by the reporting unit (see paragraph 7d, preceding), appropriate

pending and final reports must be submitted. Such reports are mandatory in order to remove the item from the National Crime Information Center (NCIC) System and to appropriately update the accountability on the data base at NWSC, Crane, Indiana. A final report must be sent to the CMC (Code MPH) and the Marine Corps registry. They will be provided with a true copy before a serial number will be removed from an AC's Asset Report (MM2W78R01).

(2) Accountability of confiscated or recovered weapons may be obtained by contacting the Marine Corps registry. Registered weapons will be returned to the last owning service and reported to the Marine Corps registry as directed in paragraph 8e(1), preceding. If the weapon is unregistered, the local Naval Investigation Service (NIS) agent will assist the reporting organization in obtaining disposition instructions from the CMC (Code MPH) in accordance with reference (a). Weapons held in excess of 6 months at the AC reporting recovery will be reported to the Marine Corps registry on DD Form 1348-1, annotating in the remarks block "abandoned," "found on post," "unclaimed," or "confiscated." Accountability for the weapon(s) will remain with the unit, until such time as the weapon(s) is (are) shipped as directed by the CMC (Code MPH). Report of shipment must be made to the Marine Corps registry, on DD Form 1348-1, in order to relieve the unit of accountability.

(3) Disposition instructions may be obtained from Commanding General (Code 832), MCLB, Albany, Georgia 31704, for unclaimed privately-owned weapons which have come into the custody or control of the Marine Corps. The request should provide a complete description of the weapons which shall include, as available, but not be limited to, manufacturer's name, caliber, country of origin, and serial number. An information copy must be provided to the Marine Corps registry. The AC reporting custody will report weapons to the Marine Corps registry on DD Form 1348-1 until such time as further disposition instructions are received. If directed to ship the weapon(s), report of shipment should be made to the Marine Corps registry on DD Form 1348-1 to relieve the AC of accountability.

(4) In the past, some weapons have had alphabetical letters or other nonnumerical symbols stamped on the end of serial numbers, resulting in confusion when serialized inventories were taken. It is policy that all elements, including nonnumerical characters of the serial number be included when reporting to NWSC, Crane, Indiana.

9. Command Relationships

a. The Commanding Officer, NWSC, Crane, Indiana, acting as the administrator of the Marine Corps Serialized Control of Small Arms System, is authorized direct contact with all Marine Corps units for routine matters related to the administration of the system. All matters not of a routine nature shall be referred to the Commanding General (Code 824/SCS), MCLB, Albany, Georgia 31704, for resolution with units/activities involved.

b. The Commanding Officer, NWSC, Crane, Indiana, is authorized to respond to inquiries from authorized law enforcement agencies in pursuit of their responsibilities regarding inquiries accessing the serial number files of the Marine Corps. However, any reports requested by agencies other than the Department of Defense regarding summary data of losses, transaction volume, number of units reporting, etc., shall be approved by the Commanding General (Code 824/SCS), MCLB, Albany, Georgia 31704, before being produced or provided.

10. Scope. The provisions of this Order are applicable to all activities of the Marine Corps and Marine Corps Reserve having weapons, including all recreation fund, miscellaneous non-appropriated fund, private organizations, RDT&E activities, and the Marine Corps museum. Excluded from this system are weapons supplied to Marine Corps aviation units by the Navy and reportable under reference (f). Also excluded are Marine Corps exchange activities which are required to report as civilian resale activities under the Department of the Treasury regulations.

11. Reserve Applicability. This Order is applicable to the Marine Corps Reserve.

H. A. HATCH
Deputy Chief of Staff
for Installations and Logistics

SAMPLE FORMAT FOR REPORTING INTERSERVICE TRANSACTIONS

The image shows a sample format for reporting interservice transactions, which is a card layout. The card is divided into several sections, each with a specific field. The fields are: Document Identifier (1-3), Routing Identifier (4-6), Transaction Code (7), Stock Number (8-22), Federal Supply Classification (8-11), NATO Item Identification Number (12-20), Local Use (21-22), Document Number (23-29), Document Number Suffix (30-43), and Department of Defense Activity Address Code (DoDAC) (44-50). The card is labeled 'SAMPLE FORMAT FOR REPORTING INTERSERVICE TRANSACTIONS' at the top.

1. The card format for transaction reporting is as follows:

<u>Position or Block</u>	<u>Title</u>	<u>Entry</u>
1-3	Document Identifier	Enter DIC DSM.
4-6	Routing Identifier	Leave blank.
7	Transaction Code	Enter "S."
8-22	Stock Number	Enter NSN or local.
8-11	Federal Supply Classification	Enter FSC.
12-20	NATO Item Identification Number	Enter NIIN.
21-22		Leave blank.
23-29	Local Use	Leave blank.
30-43	Document Number	Enter document
44	Document Number Suffix	Enter suffix number
45-50	Department of Defense Activity Address Code (DoDAC)	Enter service address
